

Vladyslav Dohadaiev

Android Developer

SUMMARY

Android developer (Kotlin) shipping reliable, user-focused apps with Jetpack/Compose and clean architecture. Comfortable modernizing legacy code, modularizing features, and improving test coverage. Collaborative, pragmatic, and quick to adopt new Android tooling.

PROFESSIONAL EXPERIENCE

Android Developer | 2023 – present

simplesurance GmbH · Berlin, Germany (Hybrid)

- Contributed to a multi-market travel-insurance app supporting multiple product flavors and backends.
- Implemented new features and screens with Jetpack Compose during the early stages of development.
- Wrote unit tests across modules to improve reliability and prevent regressions.

Kotlin Multiplatform Developer | 2021 – 2023

Innovations- und Digitalagentur – ida GmbH · Leipzig, Germany

- Worked on various media based news feeds, livestream and children’s entertainment applications with a modular shared codebase.
- Actively participated in the migration of shared modules to Kotlin Multiplatform.

Android Developer | 2019 – 2021

AppsFactory GmbH · Leipzig, Germany

- Worked on various media projects with audio and video playback for news, entertainment and children’s content applications.
- Worked on a map-based travel application.
- Refactored and improved legacy Java code.

Android Developer | Jan 2019 – Oct 2019

Author.Today · Remote

- Developed bookstore and reader application from scratch for a publishing house.

EDUCATION

Priazov State Technical University | 2015–2019

B.S. Computer Engineering / Computer Science
